OAC Brooke 3050 HU Soybean *Relative Maturity 2.2*

NEW

Characteristics

Growth Habit:	Indeterminate
Plant Type:	Medium bushiness
Pubescence:	Grey
Flowers:	Purple
Pods:	Brown
Plant Height:	82 cm
Lodging Resistance:	Excellent (1.3)
Disease:	Resistant to phytophthora
Row Width:	7" to 30"
Hilum:	Yellow
Oil Index:	19.8%
Protein Index:	42.3%
Seed Size:	Large (4600 seeds/kg)
Days to Maturity:	124

Agronomic Performance

- Very high yield in both wet and dry years
- Adapted to most soil types in Ontario and does particularly well in both loam and clay loam textured soils
- Performs well in both conventional and no-till operations
- Resistant to most races of phytophthora root rot and has excellent field tolerance
- 2013 Ontario Soybean Variety Trials 2900-3300 test two-year average is 108% across loam test sites and 106% across clay test sites
- One-year in the 2900-3300 test is 112% on loam and 108% on clay sites
- Better performance over **OAC Kent** and will be in demand for Identity Preserved food grade programs because it has good protein, large seed size and yellow hilum
- Developed by University of Guelph, Ridgetown Campus
