Organically-Approved Input Information Sheet

Seacliff Green Organic Fertilizer

Source:

Seacliff Energy Corp., Leamington ON

Guaranteed analysis:

0.1 – 0.05 – 0.1

- Liquid anaerobic digestate

- Typically 10lbs N/mt; 5lbs P_2O_5/mt; 5-8lbs K_2O/mt

- 4-5% dry matter

- 1kg/L density

Product Notes:

- For bulk application on and into agricultural soils

- Storage facilities and application equipment for liquid manure is appropriate for this product

Uses:

- Well-suited for crops and soils with high nitrogen demands relative to P and K (e.g. wheat, corn)

- Not subject to the application timing restrictions imposed on raw manure under organic standards

Application Rates:

- Application rates dependent on crop and soil test recommendations

- Do not exceed application rates above 44,000L/ha (4,706 gal/ac) if applying within 150m (500ft) of surface water

Comments:

- Market territory for this product is currently limited by the transportation costs (from Leamington) for the high volumes of liquid involved; Seacliff is investigating technology to create a concentrated liquid that could significantly expand this potential

- Customers are responsible for storage and application of the product; Seacliff has partners and contacts in certain areas willing to store and apply on a custom basis

- Seacliff Green Organic Liquid Fertilizer is approved for organic use by CSI and EcoCert
